

AGHE 811 Teaching Assistant Requirements

September 1 to December 15, 2017

One Position 20 hours – 15 weeks

Note: this is an on-line course, therefore work will be done virtually

Course Description

AGHE 811 Normal Aging Processes

This course will differentiate normal from abnormal aging and examine the theories, models and strategies for healthy aging in Canada. These principles will be studied through a mix of online and group learning activities in the context of a variety of health concerns related to aging and with respect to individual and community action and public policy.

TA Qualifications and Competencies

Qualifications:

1. PhD student
2. Demonstrated knowledge of aging processes and theories through previous coursework and/or work experience with healthy older adults
3. Existing skills or willingness to develop skills to facilitate on-line learning at the graduate level

Duties:

1. Preparing course related materials, such as lab manuals, websites, handouts etc.
2. Marking and grading
