

PT 865 TA Requirements (Total of 40 hours) 2017-2018

January 1 – February 28, 2018: PT 865 Module A - Advanced Manual Therapy Techniques (**28 hours**)

June – July 2018; PT 865 Module B - Ergonomics (**12 hours**)

Course Description:

PT-865 (4.5CR)

Motor Function & Occupation

Students will gain knowledge and skill in the assessment and management of individuals with musculoskeletal injuries related to physical work, sport and leisure activities. They will be able to critically evaluate the literature related to ergonomic assessment and intervention, including psychophysical, physiological and biomechanical approaches. Topics in occupational health and safety related to injury prevention, as well as advanced manual therapy approaches to the assessment and management of musculoskeletal injury will be included. Lab component. Pre-requisite: successful completion of PT882 or approval from the PT Program.

1. Assistance with student academic performance evaluation:

With training and guidance from the course coordinator, the TA will be responsible for grading student assignments, quizzes, and written examinations.

Essential Skills

- Strong written skills and ability to offer feedback to enable student improvement;
- Ability to document student performance and mark assignments/exams in a timely fashion;
- Willingness to learn the student internet/web platforms (e.g. 'OnQ');
- Willingness to track the content of the course leading up to any evaluation; and
- Ability and willingness to accept constructive feedback from the course coordinator.

2. Delivery of clinical skills laboratory component and its evaluation

The TA will assist the course coordinator with logistical support for the laboratory sessions.

- Strong organizational skills;
- Be available and participate in the OSCE (either as a simulated patient or examiner) at the end of February; and
- Ability and willingness to accept constructive feedback from the course coordinator.
