

PhysioGenix

Physiotherapist wanted for Orthopedic and Aquatic Rehabilitation Centre

Physiogenix / Hydrathletics

Location: Kingston, ON

Physiotherapist Position

Hydrathletics is well equipped 3500 sq. ft interdisciplinary clinic in Kingston with a specific interest in Advanced Aquatic Therapy. See www.hydrathletics.ca. The interdisciplinary services include physiotherapy, athletic therapy, registered massage therapy and kinesiology.

Physiogenix is a consulting partner of Hydrathletics and provides all its Physiotherapy service needs. Physiogenix is looking for a motivated physiotherapist, with skills in objective assessment and an ability to provide manual therapy to help improve the health and well-being of our patients. Having a knowledge of aquatic therapy would be an asset. Although the physiotherapist may support aquatic therapy as a component of the treatment plan, it is not necessary for the physiotherapist to provide this service themselves as we have other well trained aquatic therapists that can also support this role if required. The clinic is fast paced, yet the vibe is still relaxed providing opportunity to exchange ideas/learn and work as a team player with our other therapists. We currently do not employ physiotherapy aides or assistants. Physiotherapists see one client at a time 45- 60 minutes for an initial assessment and 30 minutes for a follow up treatment. We emphasize accurate assessment and diagnosis and rely heavily on manual therapy treatment techniques and or aquatic therapy to provide the best possible treatment outcomes. Although we would prefer to hire a physiotherapist with experience our clinic is also a great facility for new graduates to start their career, especially, anyone interested in enhancing their manual therapy skills as the owner/physiotherapist of Physiogenix is an Australia trained manual and manipulative therapist with FCAMT qualification.

If you want to spend time with your patients to problem solve, discuss options, treat at a comfortable pace and challenge yourself while working within an interdisciplinary team in a state-of-the-art rehabilitation and aquatic centre, then this would be an ideal work environment for you.

We are flexible and are willing to discuss options of contract or salary. You can choose either working part time hours or full-time hours. You are required to be a registered physiotherapist with appropriate liability insurance and a valid license in good standing to work in Ontario.

Please send your resume or any inquiries to randal@physiogenix.ca
